DriveAbility is an adaptive driving program designed to help people drive again following an illness, injury or physically limiting condition. DriveAbility can also assist with licensing needs, equipment acquisition, and vehicle vendor location. A registered occupational therapist/certified driver rehab specialist and certified driving instructor work with the patient to regain independence in community mobility and driving.

Pre-driving assessment is performed by a registered occupational therapist. Based on outcome of pre-driving assessment and the individual's driving goals, an on-road evaluation is initiated in cooperation with the Green Apple Driving School. Both the occupational therapist and certified driving instructor evaluate the individual's driving skill and functional mobility. Our training vehicle is equipped with instructor brake and adaptive equipment such as hand controls, left accelerator pedal, steering devices, and adaptive turn signals to assist each individual as needed.
