Camp Easter Seals offers respite care in the home under the Community Skills Training and Personal Care program. Respite is a support that provides periodic

relief for the family or primary caregiver of an individual by supervising and caring for that individual when the caregiver needs a break of the care giving responsibilities. Visit [Locations](#) where Respite is available.

Camp Easter Seals also offers respite care to parents and caregivers of children and adults with disabilities in the form of a camp. Camp provides an opportunity of children and adults with special needs to enjoy fun and challenging activities in a supportive and cooperative atmosphere. A variety of sessions are offered: Spring and Fall Weekend Respites to Summer Camp to Specialty Session. Each application is carefully reviewed.

This traditional camping program provides recreational opportunities designed to increase a camper's self-confidence as well as to challenge their physical capabilities through such physical activities as swimming, canoeing, arts, crafts, camp-outs and archery. Camp sessions run throughout the summer. Both children and adults are welcome.
