Home Recovery Home Aid offers skilled nursing care and personal care. Home health care services can include physical therapy, occupational therapy, personal care, or skilled nursing care (wound care and dressing, diabetic case management and teaching, pain management, ostomy care, bowel and bladder care, catheter care, gait training, cardiac and respiratory teaching and management and injections and venipuncture) and other health care services.

The program is designed to provide care while teaching patients and their families how to cope with problems arising from illness or disability. We also help patients use community resources if necessary.
