MossRehab Institute for Brain Health (MRIBH) offers a community-based comprehensive Traumatic Brain Injury (TBI) medical outpatient program that addresses the brain health issues associated with head trauma and PTSD.

MRIBH provides services in two phases, evaluation and intervention. Based on patient needs, team clinicians may include:

- A physician who specializes in traumatic brain injury rehabilitation and has experience with military veterans;
- Therapists who understand TBIs and the consequences of concussion;
- Mental health specialists who provide emotional support;
- Integrative medicine specialists.

For caregivers and family members, the MRIBH offers education regarding the effects of traumatic brain injury, provides access to available resources, and provides the guidance needed to support their loved one while taking care of themselves.
